ABOUT

Senior full stack engineer with over 10 years of experience building web products in fintech and ecommerce, working mainly in TypeScript and React on cloud platforms (AWS and Azure). I have led a customer-facing engineering team, contributed to hiring, roadmap planning and solution architecture, and shipped features with measurable results in revenue, conversion and retention. I am currently exploring agentic development on Azure AI Foundry and how to govern it in a regulated industry. A background in graphic design means I care about how products look and feel as much as how they work.

EXPERIENCE

Jul 2025 –
Present

Mobius

Senior Full Stack Engineer · Hybrid

- Built and launched the Visualiser, a tool that lets advisors and managers explore their schemes, exposing complex fee structures and fund allocations in a clear, visual way
- Delivered the Fund Store, giving users a single place to browse and compare the funds available to invest in, opening a new revenue stream that generated over £300k in its first few months
- Designed and built long-term audit logging for compliance: a Go outbox service publishing events to Azure Service Bus, with logs stored in a data lake
- Introduced a unified component library in Storybook and end-to-end testing with Playwright
- Exploring agentic development on Azure AI Foundry, comparing models and defining the governance needed to adopt them in a regulated industry

TypeScript · React · Go · Postgres · Drizzle · Azure · Azure AI Foundry · Storybook · Playwright

Sep 2021 –
Jul 2025

Oddbox

Lead Engineer · Hybrid

- Led a team of 3 developers in the Experience team, owning development of all customer-facing applications
- Involved in hiring, roadmap planning and solution architecture
- Launched the Oddbox Market on Shopify with a unified login across the company's platforms; 80% of customers tried it
- Migrated all ~230,000 customers to a new subscription platform, unlocking features such as box customisation that increased retention by 30%
- Optimised the signup and cancellation flows, increasing conversion by 15% and retention by 11%

TypeScript · React · Python · AWS · Serverless · DynamoDB

Sep 2019 –
Sep 2021

graze
Senior Frontend Developer · Hybrid

- Developed and maintained multiple direct-to-consumer ecommerce apps and websites, applying UX skills to improve customer journeys
- Ran sprint planning for the web team, scoping and allocating work
- Supported expansion into Europe with a bespoke subscription solution built on Shopify, launching 2 new storefronts in the Netherlands and Germany

React · PHP · Shopify

Jan 2019 –
Sep 2019

VIVID Travel
Frontend Developer & Designer

- Sole frontend developer, designing and building new features on the Umbraco CMS
- Ran A/B tests with VWO and Hotjar to optimise conversion

Dec 2017 –
Sep 2018

Situation Publishing (The Register) · Frontend Developer

Jun 2015 –
Nov 2017

S&P Global · Frontend Developer & Graphic Designer

Sep 2012 –
Mar 2015

Good Livin' Publication · Graphic and Digital Designer

Jan 2011 –
Aug 2012

CTU Training Solutions · Graphic Design and Web Developer Facilitator

SKILLS

Technical

Languages: TypeScript, JavaScript, Go, Python, PHP, HTML/CSS

Backend & data: Node, Postgres, Drizzle, DynamoDB

Testing & tooling: Playwright, Git

Frontend: React, Storybook, Shopify / Liquid

Cloud: AWS, Serverless, Azure, Service Bus

AI: Azure AI Foundry, Claude Code, agentic development

Design

UX and UI design, Figma, A/B testing and conversion optimisation
